

GUIDELINES FOR BUSINESS PREMISES IN THE EARLY ENDEMIC PHASE UNDER THE NATIONAL COVID-19 RECOVERY FRAMEWORK

1. This document provides updated guidelines for business premises during the Early Endemic Phase of the National COVID-19 Recovery Framework.
2. The Early Endemic Phase began on 15 December 2021 and among the measures that can be implemented include updates to the opening and easing of restrictions in workplaces and business premises for vaccinated and unvaccinated individuals. The Endemic phase accepts the 'new normal' of living in a post-pandemic COVID-19 world with minimal disruption.
3. The Early Endemic Phase approach will continue compliance with the COVID-19 Control Measures and expand the use of Antigen Rapid Test (ART) as a screening and surveillance tool to detect the possibility of early infection.
4. The COVID-19 Control Measures are as follows:
 - a) Use of BruHealth App
 - BruHealth Registration : All premises must register for a BruHealth QR code that is printed and placed at the entrance area.
 - Employees registration : Owners are required to ensure all their employees are registered in the BruHealth App. The employees are required to scan in/out when they arrive/leave the work premises.
 - Scan the BruHealth Code : Premise owners must ensure that all individuals entering the premise scan their BruHealth App upon entry (including all employees / staff / volunteers).
 - BruHealth Code Colour : Premise owners must ensure that only individuals with BruHealth green and yellow codes are allowed to enter.
 - b) Complete Vaccination - Premise owners must ensure that all employees / staff / volunteers who are eligible to be vaccinated (no medical contraindications) have been fully vaccinated. An individual is considered to have been fully vaccinated if he or she has received **two doses** of the vaccine in the World Health Organization (WHO) Emergency Use List or a vaccine approved by the Brunei Darussalam Medicines Control Authority (BDMCA). Vaccination status in the BruHealth app, International Vaccination Certificate or Prophylaxis Book (Yellow Book) or other acceptable vaccination record can be

shown to the company management or event organizer as proof of vaccination.

- c) Social distancing - Adopt social and physical distancing measures of at least 1.5 metres between individuals if possible.
- d) Premise Ventilation - Owners must ensure adequate ventilation of their premises.
- e) Business Continuity Protocols - Have a Business Continuity Plan (BCP) in place to ensure business remains operational during an outbreak such as having alternate teams and contact tracing guidelines.
- f) Antigen Rapid Test (ART) - Implement ART, when necessary, according to the ART Guidelines issued by the Ministry of Health (MOH).

5. Business premises are required to provide their full cooperation and comply with any directives issued by the Government from time to time. Any business premise owner found not in compliance with the guidelines for re-opening of business premises **may be subject to legal action under the Infectious Diseases Act Chapter 204** and the premises **may be ordered to close immediately**.

6. The updated guidelines for opening of business premises or current business operations including activities permitted are as follows:

A. GUIDELINES FOR DINE-IN SERVICES AT FOOD PREMISES

Updated measures and requirements for dine-in services at food premises such as restaurants, cafes, stalls and food courts are as follows:
